## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election with traverse of Group II in Paper No. 7 is acknowledged. The traversal is on the ground(s) that no serious burden to search and examine the plural groups exists. . This is not found persuasive because Group I involves the reactive probes which would involve a divergent subject matter from Group II. Moreover the composite substrate may be used in a plurality of different functions including chip manufacture.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A) Claims 29 –31 lack active steps. It is unclear as to whether the claims are drawn to a product or method of making a product.

Art Unit: 1637

B) Claim 28 is unclear because it cannot be determined to what process would be like polishing.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 27,29,30,31 are rejected under 35 U.S.C. 102(b) as being anticipated by Bauman et al (US5,830,767 Nov.3, 1998).

Bauman teach a composite substrate with a plurality of porous regions arrayed on and compartmented by non porous regions (see entire document esp. abstract, Fig. 2, col.2 lines 34-42 & col. 12 lines 51-53). They derive the porous material from various substrates whose total surface is a porous solid (see col. 9-11). They process the surface by cold pressing , slip casting (see col. 11 lines 50-55).

**SUMMARY**

4. No claims allowed.
